

### WH-BU Brazing Unit

**High capacity brazing tongs for the brazing of copper section. Also for large cross sectional welding of multiple wires with silver solder as a melting agent**

This unit comprises of a small portable main control box, connected to which, via suitable leads, is a pair of brazing tongs. These tongs are purpose built with special carbon brushes. By inserting copper strips between the carbon tips and depressing the robust foot pedal, brazing temperature can be reached within a few minutes.

Straight or angled tongs are available

#### Features

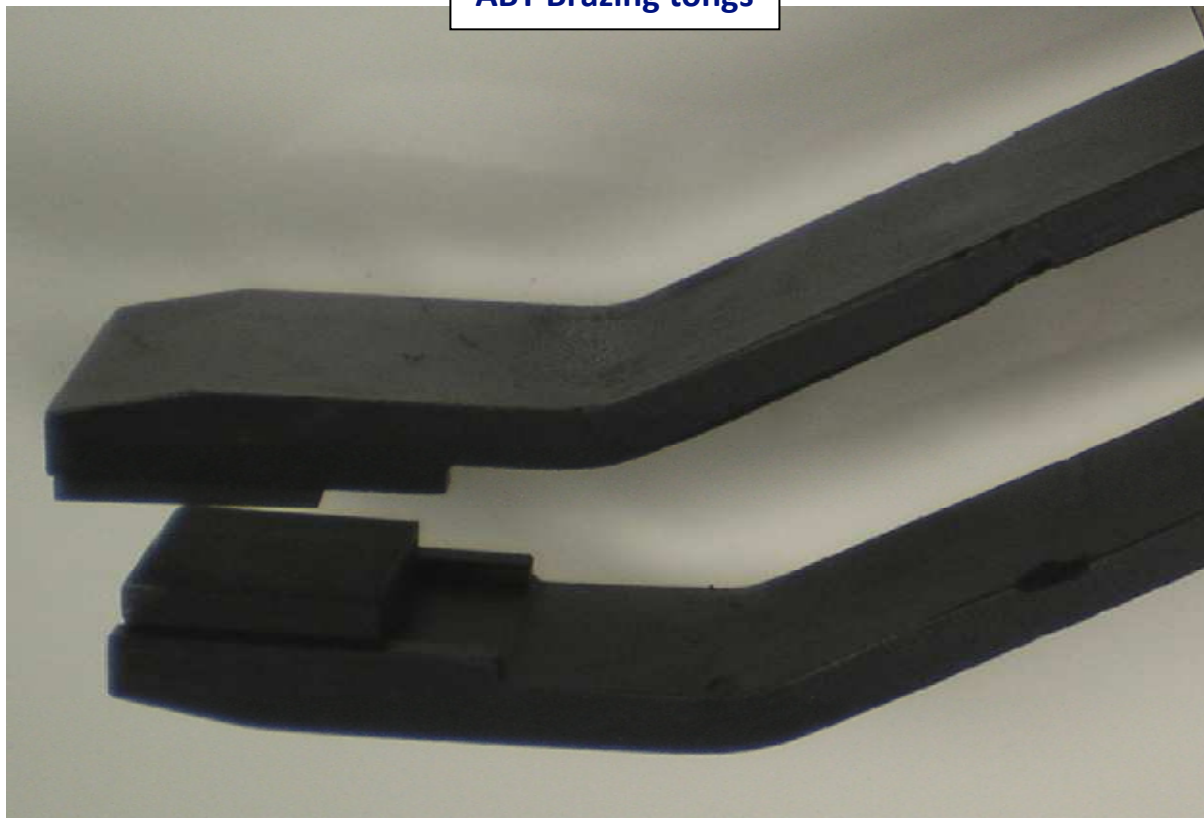

- Compact, making the unit easily portable for site work
- Can be plugged into a normal UK 13 amp socket. (No special supply needed)
- Isolated transformer used for safety.

#### Technical Data

Electrical supply	220/250V single phase 50/60Hz 13amp
Brazing capacity	braze copper strip up to a maximum cross sectional area of 200mm <sup>2</sup>
Maximum temperature	Up to 500 degrees Celsius for short periods. When brazing multiple wires use silver solder which melts at around 180-200 degrees Celsius
Dimensions	300 x 180 x 150 mm (L x H x W)
Weight	25 kg

**New pair of:  
ABT Brazing tongs**

**Modified pair of:  
ABT Brazing tongs**
